EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Olivia Tsai on 02 April 2008.

3. The application has been amended as follows:
 - **Cancel claims 1 – 7, 9, 20 – 24, and 26.**
 - **Amend claim 8 to read as follows:**

A method comprising:

determining an amount of available memory credits in an input/output (I/O) controller;

communicating to a chipset within a device coupled to the I/O controller within the device the amount of available memory credits; and

sending an amount of data from the chipset to the I/O controller, the amount of data sent being one of equivalent to or less than the communicated available memory credit amount; and

wherein determining the available amount of memory credits comprises:

comparing an amount of available memory in each of a plurality of buffers contained within the I/O controller; and

determining a least amount of available memory in one of the plurality of buffers to create an amount of available memory in the I/O controller.

- **Amend claim 10 to read as follows:**

The method of claim 8, further comprising:

converting the amount of available memory in the I/O controller to an amount of available memory credits.

- **Amend claim 12 to read as follows:**

The method of claim 8, further comprising:

temporarily storing the data sent from the chipset in the I/O controller.

- **Amend claim 25 to read as follows:**

A machine readable medium having instructions stored therein which when executed cause a machine to perform a set of operations comprising:

determining an amount of available memory credits in an input/output (I/O) controller;

communicating to a chipset within a device coupled to the I/O controller within the device the amount of available memory credits; and

sending an amount of data from the chipset to the I/O controller, the amount of data sent being one of equivalent to or less than the communicated available memory credit amount; and

wherein determining the available amount of memory credits comprises:

comparing an amount of available memory in each of a plurality of buffers contained within the I/O controller; and

determining a least amount of available memory in one of the plurality of buffers to create an amount of available memory in the I/O controller.

- **Amend claim 27 as follows:**

The machine read medium of claim 25, having further instructions stored therein which when executed cause a machine to perform a set of operations further comprising:

temporarily storing the data in at least one buffer contained within the I/O controller;

emptying the buffer of at least some of the data temporarily stored in the I/O controller onto an I/O bus coupled to the I/O controller to create a new amount of available memory credits in the I/O controller; and

simultaneously tracking amounts of memory credits the I/O controller empties onto the I/O bus, amounts of memory credits sent to the I/O controller from the chipset and amounts of memory credits made available by distribution of the data sent from the chipset to a plurality of buffers contained within the I/O controller.

DETAILED ACTION

4. Claims 8, 10 – 19, 25, and 27 are pending.

Allowable Subject Matter

5. Claims 8, 10 – 19, 25, and 27 are allowed.
6. The following is an examiner's statement of reasons for allowance:

Claims 8, 10 – 19, 25 and 27 are allowed because the prior art of record fails to teach or suggest alone or in combination ***comparing an amount of available memory in each of a plurality of buffers contained within the I/O controller; and determining a least amount of available memory in one of the plurality of buffers to create an amount of available memory in the I/O controller***, as required by independent claims 8 and 25, ***in combination with the other recited claim limitations*** (emphasis added). The prior art of record fails to teach comparing the available memory in each of a plurality of buffers and determining the amount of available memory to be that of the buffer with the least amount of available memory.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
